Summary

Frontend Engineer specializing in Vue.js and TypeScript, with experience building responsive, scalable, and high-performance web applications using modern technologies. Skilled in component-based architecture, state management with a focus on creating maintainable and user-focused interfaces. Leveraging over 10 years of experience in logistics as a Senior Carrier Sales Representative and Broker. Developed expertise in managing complex workflows, optimizing operations, and solving problems in fast-paced environments.

Technical Skills

- Frontend Technologies: Vue.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Tailwind CSS
- Developer Tools: Git, GitHub, Vite, npm, Visual Studio Code
- Frontend Concepts: Component-Based Architecture, Responsive Design (Mobile-First), State Management
- UI/UX & Design: User Interface (UI) Design, Semantic HTML, Layout & Visual Hierarchy
- Professional Strengths: Workflow Optimization, Problem-Solving, Cross-Functional Communication, Operations-Focused Thinking

Professional Experience

Senior Carrier Sales

Fairmont Logistics – Beverly Hills, CA

March 2023 to October 2025

- Managed a high-volume database of shipments, coordinating with vendors to deliver cost-effective and reliable transportation solutions
- Oversaw shipping, receiving, and inventory tracking processes, ensuring accuracy and operational efficiency across workflows
- Strengthened vendor relationships while maintaining consistent quality control and service standards
- Maintained and managed operational data across platforms including Aljex, Excel, Google Sheets, ITS Dispatch and DAT ensuring accuracy and supporting data-driven decision-making
- Negotiated competitive shipping rates, contributing to increased profitability and long-term business partnerships

Logistics Specialist

Ihaul Freight Inc – San Dimas, CA

February 2021 to March 2023

- Built and maintained strong relationships with drivers and suppliers, contributing to repeat business and long-term partnerships
- Managed high-pressure, time-sensitive situations by prioritizing tasks and delivering efficient solutions that maintained customer satisfaction
- Oversaw after-hours operations, handling customer inquiries and delegating tasks based on urgency and operational priorities
- Managed operational data across platforms including Tailwind TMS, ITS Dispatch, and DAT, ensuring accuracy and supporting data-driven decision-making
- Handled high-volume communication across phone and email, providing timely support for drivers, clients, and internal teams

Contribution Summary

My background is a unique blend of hands-on logistics experience and modern frontend engineering, allowing me to approach applications with a strong focus on efficiency and real-world usability offering a systems-focused perspective on building scalable applications. I'm comfortable collaborating with teams of all sizes, contributing thoughtful feedback, and aligning technical decisions with practical outcomes. I value clean maintainable code and take pride in providing solutions that scale and hold up as systems grow.
